

The Founder

The founder of Xuan Kong Zhang Pai School (玄空掌派) is Grand Master Lau Rui Shan and he has more than twenty-five years of extensive research on Bagua I-Ching and Feng Shui applications. Master Lau extensive researches reached a breakthrough whereby he managed to put together the missing pieces of ancient metaphysics. He has created a Chinese website (<http://www.fengshui-chinese.com>) for free to all practitioners around the world to share and learn from each other. His un-selfishness attitude is highly admirable but sad to say most of his works and creations were stolen, copied and labeled as their own findings. Without proper understanding or the rationale of Master Lau theories will create a detrimental outcome if some of the methods were applied incorrectly. Knowledge is powerful but improper use of his knowledge deeply disappointed Master Lau. In order to pass down the message and methods properly Master Lau created this Chinese metaphysics school. He believed that everything he teaches can be found in a 'palm', that is why the name of this school is Xuan Kong Zhang Pai.

Master Lau observed the nature movements, stars rotations or orbits as well as the interaction among them. He found out that basic and fundamental theory is most powerful methodology to analyze and form hypothesis for a research base to next his findings. In other words, to understand Chinese metaphysics in natural way by observing the movements of stars and the interaction. For example, see the following picture. The Movement of Sun (solar) and Moon (Lunar) and earth which can be represented by Bagua and thus to form the forecast methods.

Master Lau's Lok Shu Diagram

4	9	2
3	5	7
8	1	6

The wonder of traditional magic Lok Shu square The sum of each line (whether vertical, horizontal or diagonal) always equals fifteen. The quantum number five in the center is powerful number and, if you ignore the 5 in the center, you will notice that the number opposite each other all sums up to 10.
